Software engineering undergraduate with one year of experience in React front-end development. Skilled in problem-solving and team collaboration. Committed to continuous learning and developing innovative solutions that positively impact organizations. Open to constructive feedback and dedicated to improving skills and abilities.

Professional Experience

Niftron (Pvt) Ltd, Software Engineering Intern 2021 Jul – 2022 Jul | Dehiwala, Sri Lanka

- **GameR:** Decentralized gaming app leveraging blockchain features like NFT minting and decentralized identification
 - Developed new screens and UI enhancements resulting in improved user engagement and a modern UI (Apr-Jul 2022)
 - Technologies and tools used: *ReactJS*
- **DePro (Decentralized Profile):** Build Instant Organic Trust
 - Worked on UI/UX and app development resulting in a streamlined and user-friendly experience.
 - Created instructional videos resulting in decreased user support requests (Jan-Apr 2022)
 - Technologies and tools used: *Figma, ReactJS, Redux, Adobe PremierPro*
- **Nextentry KYC:** Blockchain-based Know Your Customer app providing instant verification and trust for unknown parties
 - Worked on UI/UX, mockup designs, prototypes, app development, and API integration resulting in a more user-friendly and efficient onboarding process (Nov 2021-Mar 2022)
 - Technologies and tools used: *Figma, ReactJS, Redux, CSS*
- **Exip-UI:** Decentralized Domain Solution
 - Developed a successful proof-of-concept receiving positive feedback from stakeholders (Sep 2021)
 - Technologies and tools used: *ReactJS, Redux*

Education

University of Westminster, BEng. (Hons) Software Engineering - (IIT Sri Lanka) 2020 – present | London, United Kingdom

S. Thomas' College, GCE Advanced Level Examination (2019) - 5208718 2011 – 2019 | Mount Lavinia, Sri Lanka
Z-Score: 1.4080

Projects

Mealometer, Final Year Project (IIT) 2022 Sep – 2023 May

A food image recognition and diet tracking system that uses an AI-based image processing model to allow users to track nutrition easily and promote understanding of proper nutritional needs for weight management.

- Technologies and tools used: *Python, PyTorch, ReactJS, Flask*

News Seeker, Software Development Group Project (IIT) 2020 Sep – 2021 Apr

Collaborated on building a system with the use of natural language processing to identify real and fake news to allow users to know which is which when inputted into the system.

- Technologies and tools used: *React Native, Twitter API, News API, Firebase, MongoDB*

SocialScope, Personal Project 2023 Mar – 2023 Mar

Developed a full-stack social media application using React and MERN stack. The app allows users to upload posts, add/ remove friends, toggle between light/ dark mode, and like/ dislike posts with a sleek and modern interface.

- Technologies and tools used: *React, MongoDB, Express.js, Node.js*

Skills

Programming Languages | Java, Python, JavaScript

Front-end Development | HTML, CSS, ReactJS, NextJS, Redux, TailwindCSS, Figma (UI/UX design)

Back-end Development and Databases | NodeJS, Flask, MongoDB, Firebase, SQL

Mobile Development | Android, React Native

Version Control | Git, GitHub
